ARALert

ISO 25010:2023 Evaluation Tool

Part I. User Information

Name (Optional): _____

Date of Evaluation: _____ Role: [ ] Tutor [ ] Student [ ] Admin [ ] Faculty [ ] Principal [ ] IT Expert

Part II. System Evaluation Questionnaire

Instructions: Please rate your agreement with each statement using the scale below.

Numerical Rating and Equivalent

5 - Strongly Agree | 4 - Agree | 3 - Neutral | 2 - Disagree | 1 - Strongly Disagree

A. Functional Suitability

- Represents the degree to which a product or system provides functions that meet stated and implied needs when used under specified conditions.

No.	Functional Suitability	5	4	3	2	1
1	The system includes all expected features (session QR attendance, weekly intervention scoring, early risk alerts, and exportable reports).					
2	The system performed all functions correctly and accurately.					
3	The features were appropriate and helpful for completing my tasks.					
4	The data analytics model correctly classified learner risk levels (High, Moderate, Low Risk) based on session attendance records and weekly intervention activity scores to enable early tutor intervention.					
5	The system generated submission-ready reports and notifications as expected.					

B. Performance Efficiency

- Represents the performance relative to the amount of resources used under stated conditions.

No.	Performance Efficiency	5	4	3	2	1
1	The system responded quickly to my actions.					
2	Pages loaded without noticeable delays.					
3	The system handled multiple tasks and simultaneous requests without slowing down.					
4	File exports (DOCX/PDF/Excel) and camera QR code scans were processed quickly.					
5	The system performed efficiently even with multiple users logged in.					

C. Compatibility

No.	Compatibility	5	4	3	2	1
1	Can be accessed across different devices (desktop, laptop, smartphone, tablet) without issues.					
2	The system works well alongside other applications I use (e.g., browser, camera).					
3	The system can export and share data with other formats if needed (e.g., DOCX/Excel/PDF).					
4	The system did not interfere with other applications running on my device.					
5	Performed consistently across different browsers or platforms.					

D. Interaction Capability

No.	Interaction Capability	5	4	3	2	1
1	Easy to learn and navigate without prior training.					
2	The interface was intuitive and user-friendly.					
3	I could easily find the features and menus I needed.					
4	The system helps me avoid making errors (e.g., validation messages, duplicate scan warnings).					
5	Provided clear feedback for every action I performed.					

E. Reliability

- Degree to which a system, product or component performs specified functions under specified conditions for a specified period of time.

No.	Reliability	5	4	3	2	1
1	Stable and did not crash during use.					
2	Available and accessible when I needed it.					
3	The system handled my inputs without errors or delays.					
4	I felt confident that student attendance, scores, and evaluation records were saved and not lost.					
5	The system recovered properly after any interruption or network error.					

F. Security

No.	Security	5	4	3	2	1
1	The system correctly restricted access based on user roles (Student, Tutor, Faculty, Principal, Admin).					
2	I felt that student academic data and records were protected from unauthorized access.					
3	The authentication and role-based login process was secure and seamless.					
4	The system protected sensitive information (e.g., personal details, assessment scores) appropriately.					
5	I can trace back actions and activities performed in the system.					

G. Safety

- The capability of a product under defined conditions to avoid a state in which human life, health, property, or the environment is endangered.

No.	Safety	5	4	3	2	1
1	Does not cause harm to users, data integrity, or school operations.					
2	Provides warnings or confirmations before critical or irreversible actions (e.g., student level advancement, score overwrites).					
3	Prevents actions that could lead to data loss or service disruption.					
4	The system's automation does not create unsafe or biased outcomes.					
5	The system can be safely used without risk to user privacy or well-being.					

Note: This section is only for IT Expert Evaluators. If you are not one, you are free to skip Items H & I.

H. Maintainability

No.	Maintainability	5	4	3	2	1
1	Features can be easily updated or modified without breaking other functions.					
2	System components are organized in a way that allows independent changes.					
3	Issues/bugs in the system can be diagnosed and fixed efficiently.					
4	The system can be tested easily to verify if changes work correctly.					
5	The system's modular architecture supports future improvements.					

I. Flexibility

- Degree to which a product can be adapted to changes in its requirements, contexts of use, or system environment.

No.	Flexibility	5	4	3	2	1
1	Can adapt to different screen sizes and device resolutions.					
2	Can handle an increasing number of users or requests without major issues.					
3	Can be accessed on new devices with minimal setup via standard web browsers.					
4	Can be adjusted if DepEd ARAL Program guidelines (RA 12028) or grading criteria change.					
5	Can potentially replace or integrate with existing manual paper/spreadsheet processes smoothly.					

Part III. Open Ended Question

Please provide further comments about your experience in using ARALert. Kindly identify its strong points to be enhanced and its weak points that need to be addressed for improvements if applicable.
